Simplify everyday temporization.

3M™ Protemp™ 4 Temporization Material

Create strong, esthetic provisionals with minimal work.

A fast and easy procedure

- Automix system offers fast and consistent material delivery
- Easy handling saves procedure time
- Short setting time

Record-breaking toughness

3M nanofillers and polymers work together to make Protemp 4 Temporization Material strong, flexible and fast—making it suitable for a wide range of applications, including fabrication of:

- Temporary crowns, bridges, inlays, onlays and veneers
- Long-lasting temporary restorations

Protemp 4 Temporization Material showed greater compressive strength than other tested temporization materials.

*Not indicated for long-term temporization

Outstanding esthetics

Protemp 4 Temporization Material looks naturally beautiful in any lighting conditions—and holds its color, which is especially important for long-term indications.

Simple to achieve a high gloss

- Just wipe with alcohol for a fast, beautiful shine!
- A smooth, glossy surface enables easy plaque removal to support gingival health
- No need to polish or glaze
- Available in color-stable fluorescent shades

Provisionals are important and material matters.

Temporary restorations have an important job. They preserve space for the final restoration, protect and provide esthetic coverage for the prepared tooth and support chewing and gingival healing. Ultimately, they make seating the final crown or bridge easier.

The material you select matters. 3M™ Protemp™ 4 Temporization Material makes the choice between bis-acrylic and acrylic material easy.

Bis-acrylics have many advantages over acrylics.¹

Switching to bis-acrylic material can save you time and trouble every time you temporize.

Advantages	Bis-acrylics (paste/paste)
Consistent and convenient automix delivery	✓
Lower exothermic reaction	✓
Lower shrinkage.....	✓
Precision fit	✓
Minimal odor	✓

Ordering Information

3M™ Protemp™ 4 Temporization Material

Item No. Product Information

46953 3M™ Protemp™ 4 Temporization Material Introductory Kit—A2
Includes: 1 – 50ml cartridge, Shade A2; 16 – 3M™ Garant™ Mixing Tips, Blue; 1 – 3M™ Garant™ Dispenser 10:1; 1 – 3M™ RelyX™ Temp NE Cement; 1 syringe 3M™ Filtek™ Supreme XTE Flowable Restorative A2 with mixing tips; Technique Card; Instructions for Use

3M™ Protemp™ Temporization Material Refills

Each includes 1 – 50ml cartridge; 16 – 3M™ Garant™ Mixing Tips, Blue

46959	Bleach	46957	A3
46954	A1	46972	A3.5
46956	A2	46960	B3
71453	3M™ Garant™ Mixing Tips Refill—Blue Includes: 50 Mixing Tips		

3M™ RelyX™ Temporary Cements

Item No. Product Information

56660 3M™ RelyX™ Temp NE Cement (non-eugenol)
Includes: 1 – 30g 3M™ RelyX™ Temp NE base paste; 1 – 13g RelyX Temp NE catalyst paste; 1 mixing pad

35014 3M™ RelyX™ Temp E Cement (eugenol)
Includes: 1 – 25g 3M™ RelyX™ Temp E base paste; 1 – 18g RelyX Temp E catalyst paste; 1 mixing pad

3M™ Protemp™ Crown Temporization Material

These preformed crowns are ideal for missing tooth structure. No impression is needed, and it's malleable and light-curable. It comes in nine sizes and one universal shade.
